

Setting Up Application Environment

Create Sendgrid Account

The screenshot shows the Twilio SendGrid dashboard. On the left is a sidebar with the user's name 'Nanthakumaran S' and a list of navigation items: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS (marked as NEW). Below these items is a 'REPUTATION' bar at 100% and a link to 'VIEW ACCOUNT USAGE'. The main content area has a welcome message 'Welcome, Nanthakumaran!' and a sub-header 'Send your first emails with Twilio SendGrid'. Below this is a section titled 'Send your first email' with a dropdown arrow. It contains two main options: 'Integrate using our Web API or SMTP Relay' (with a code icon) and 'Build and send using Marketing Campaigns' (with a megaphone icon). Each option has a brief description and a 'Start' button. At the bottom, there is a section for 'Integrate with third-party applications' with a 'Learn More' button. An illustration of two people running is in the top right corner.

Welcome, Nanthakumaran!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Send your first email

Choose one of these common ways to send email. You can always explore the other options later.

Integrate using our Web API or SMTP Relay

Easily send API-driven email from your application.

[Start](#)

Build and send using Marketing Campaigns

Build engaging email marketing campaigns that deliver results.

[Start](#)

Integrate with third-party applications

Quickly send email from Wordpress, Drupal, Magento, and other popular applications.
